

Genuine AP Lockheed CP2195 Calipers

The CP2195 caliper was produced from 1965 to 1979 for racing motorcycles until superseded by the CP2696 -38EO caliper in 1980, which is still produced today.

Although the CP2696 caliper has the same mounting dimensions and uses the same pads and pistons as CP2195, it does not have the ribbing at both ends of the original product and is not handed.

CP2195 calipers are forged and hard anodized.

CP2195 was reintroduced after the fire at the UK's National Motorcycle museum in 2004 and is now manufactured exclusively for Andover Norton.

APCP2195-1002EO Caliper for front RH or rear LH mounting: £299.89 plus carr./VAT (if applicable)

APCP2195-1003EO Caliper for front LH or rear RH mounting: £299.89 plus carr./VAT (if applicable)
