

## Norton „Glitter“ Colours

### **Metalflake Inc.**

The „Glitter“ colours started as a fashion in the American customizer scene in 1959.

Metalflake Inc. Invested early in the new trend and started business in 1961, became Inc. in 1963, and registered "Metalflake" as a trademark in 1967.

Metalfakes "Royal Blue" is Norton's "Firelake" or "Pacific Shimmer Blue".

1990 the firm was either liquidated or re-started. A Metalflake Corp. Does exist today.

the colours are definitely identical with Norton colours off the time and a customer has managed to respray a Commando with their paint 100% as original:
